Chapter 1: Start

The Lean Startup method teaches you how to drive a startup—how to steer, when to turn, and when to persevere—and grow a business with maximum acceleration. It is a principled approach to new product development. The fundamental activity of a startup is to turn ideas into products, measure how customers respond, and then learn whether to pivot or persevere.

Chapter 2: Define

A startup is a human institution designed to create a new product or service under conditions of extreme uncertainty. What differentiates entrepreneurs from non-entrepreneurs is that entrepreneurs create new products or services under extreme uncertainty. This is true whether you are working in a garage or inside a large corporation.
